

ABOUT

Engineering leader w/ 18+ yrs building secure, high-performance cloud platforms & distributed systems. Led teams developing ransomware detection, malware analysis, & threat identification systems. Expert in cloud security architecture, incident response automation, & scaling infrastructure protecting enterprise systems.

SKILLS

Leadership & Strategy

Technology Leadership, Cloud Security Strategy, Team Scaling & Mentorship, Product Delivery, Roadmapping

Architecture & Systems

Distributed Systems, Cloud-Native Security (AWS, Azure), High-Availability Design, Microservices, Threat Detection

Technical Expertise

DevOps & CI/CD, Infrastructure as Code (Terraform, Ansible), Performance Optimization, Security Automation

EDUCATION

Ph.D., Electrical & Computer Engineering
Carleton University, 2019

M.Sc., Computer Science
University of Calcutta, 2009

B.Sc., Computer Science
University of Calcutta, 2007

Anshuman Biswas

VP of Engineering

✉ anshuman@biswas.me 📞 +1 647-982-9354 🌐 biswas.me 📁 LinkedIn

VP of Engineering @ Elastio

Jan '25 – Present

Lead engineering teams building cloud-native ransomware detection & data protection platforms identifying threats in seconds across enterprise backups

Architect malware scanning engines w/ AI-powered anomaly detection, behavioral analysis & signature-based threat identification for automated incident response

Design security-first infrastructure across AWS & Azure protecting customers from ransomware, zero-day exploits & advanced persistent threats w/ 99.99% uptime

Implement secure SDLC practices including threat modeling, security code reviews, vulnerability scanning & penetration testing across all product lines

Senior Engineering Manager @ Veeva Systems

Mar '24 – Jan '25

Engineered secure, scalable contact center capabilities into Veeva CRM w/ end-to-end encryption, access controls & compliance features for global pharma enterprises

Implemented security compliance frameworks (SOC2, HIPAA) across product lifecycle; led security audits & vulnerability remediation programs

Scaled organization by hiring & mentoring engineers/managers; established secure coding standards & security-focused development practices

Senior Engineering Manager @ IBM Turbonomic

Jul '17 – Mar '24

Managed globally distributed teams building core orchestration & performance monitoring systems w/ built-in security controls for cloud infrastructure

Deployed Granite LLM models for security threat identification, automated code analysis & vulnerability detection in enterprise environments

Drove DevOps automation w/ security gates reducing onboarding time 60%; architected secure, high-throughput enterprise integrations w/ OAuth2/SAML

Established security incident response protocols; led forensic analysis & post-incident reviews for production security events

Sr. Software Engineer → Engineering Mgr ('18) → Sr. Engineering Mgr ('21)

Prior Engineering Roles @ Various

'07 – '17

Trend Micro (Sr. Software Engineer, '16-'17): Built distributed cloud security systems w/ real-time malware detection, heuristic analysis & online DB migration tool; implemented threat intelligence feeds & signature updates for enterprise customers

Nearest.com (CTO, '12-'14): Architected fault-tolerant search infrastructure on AWS & Google Cloud; led security team; established security best practices
