

ABOUT

Engineering leader w/ 18+ yrs building secure, high-performance cloud platforms & distributed systems. Led teams developing ransomware detection, malware analysis, & threat identification systems. Expert in cloud security architecture, incident response automation, & scaling infrastructure protecting enterprise systems.

SKILLS

Leadership & Strategy

Technology Leadership, Cloud Security Strategy, Team Scaling & Mentorship, Product Delivery, Roadmapping

Architecture & Systems

Distributed Systems, Cloud-Native Security (AWS, Azure), High-Availability Design, Microservices, Threat Detection

Technical Expertise

DevOps & CI/CD, Infrastructure as Code (Terraform, Ansible), Performance Optimization, Security Automation

EDUCATION

Ph.D., Electrical & Computer Engineering

Carleton University, 2019

M.Sc., Computer Science

University of Calcutta, 2009

B.Sc., Computer Science

University of Calcutta, 2007

Anshuman Biswas

VP of Engineering

 anshuman@biswas.me     +1 647-982-9354     biswas.me     LinkedIn

EXPERIENCE

VP of Engineering @ Elastio

Jan '25 – Present

Lead engineering teams building cloud-native ransomware detection and data protection platforms identifying threats in seconds across enterprise backups

Architect malware scanning engines with AI-powered anomaly detection for automated incident response and recovery orchestration

Scale security infrastructure across AWS and Azure, protecting enterprise customers from ransomware attacks with 99.99% uptime SLAs

Senior Engineering Manager @ Veeva Systems

Mar '24 – Jan '25

Engineered scalable contact center capabilities into Veeva CRM, optimizing performance for global enterprise deployments

Scaled organization by hiring and mentoring engineers and managers while owning full product delivery lifecycle

Senior Engineering Manager @ IBM Turbonomic

Jul '17 – Mar '24

Managed globally distributed teams building core orchestration and performance monitoring systems for cloud-scale infrastructure

Deployed Granite LLM models for security threat identification and automated code analysis in enterprise environments

Drove DevOps automation reducing onboarding time 60%; architected high-throughput enterprise integrations

*Promoted: Sr. Software Engineer ('18) → Engineering Manager ('21) → Sr. Engineering Manager*

Prior Engineering Roles @ Various

'07 – '17

Trend Micro (Senior Software Engineer, '16-'17): Built distributed cloud security systems with real-time malware detection and online database migration tool enabling zero-downtime security updates

Nearest.com (CTO, '12-'14): Architected fault-tolerant, auto-scaling search infrastructure on AWS & OpenStack serving millions of location queries

Tata Consultancy Services ('09-'12): Led enterprise SAP BI implementations and cloud migrations with security hardening for Fortune 500 clients

Additional: Research cloud platforms & security (Carleton, '15-'16), airline reservation systems ('09), network stack development ('07-'08)
