

ABOUT

Engineering leader with 18+ years of experience building secure, high-performance cloud platforms and distributed systems. Expert in cloud security architecture and scalable infrastructure. Proven ability to translate complex technical challenges into high-impact solutions, driving innovation by building and mentoring elite engineering teams.

SKILLS

Leadership & Strategy

Technology Leadership, Cloud Security Strategy, Team Scaling & Mentorship, Product Delivery, Roadmapping

Architecture & Systems

Distributed Systems, Cloud-Native Security (AWS, Azure), High-Availability Design, Microservices, Threat Detection

Technical Expertise

DevOps & CI/CD, Infrastructure as Code (Terraform, Ansible), Performance Optimization, Security Automation

EDUCATION

Ph.D., Electrical & Computer Engineering

Carleton University, 2019

M.Sc., Computer Science

University of Calcutta, 2009

B.Sc., Computer Science

University of Calcutta, 2007

Anshuman Biswas

VP of Engineering

EXPERIENCE

VP of Engineering @ Elastic

Jan 2025 – Present

- Lead engineering teams building cloud-native ransomware detection and data protection platforms with sub-second threat identification at petabyte scale
- Architect AI-powered security systems leveraging MCP servers for intelligent threat detection, automated incident response, and recovery orchestration
- Scale high-availability infrastructure across AWS and Azure, ensuring 99.99% uptime for enterprise customers' critical data protection workloads

Senior Engineering Manager @ Veeva Systems

Mar 2024 – Jan 2025

- Engineered scalable contact center capabilities into Veeva CRM, optimizing performance for global enterprise deployments
- Scaled organization by hiring and mentoring engineers and managers while owning full product delivery lifecycle

Senior Engineering Manager @ IBM Turbonomic

Jul 2017 – Mar 2024

- Managed globally distributed teams building core orchestration and performance monitoring systems for cloud-scale infrastructure
- Deployed Granite LLM models for security threat identification and automated code analysis in enterprise environments
- Drove DevOps automation reducing onboarding time 60%; architected high-throughput enterprise integrations

Promoted from Sr. Software Engineer → Engineering Manager (2017–2018)

Prior Engineering Roles @ Various

2007 – 2017

- Nearest.com (CTO): Architected fault-tolerant, auto-scaling search infrastructure on AWS & OpenStack
- Trend Micro: Built distributed cloud security systems with real-time threat detection on AWS
- Tata Consultancy Services: Led enterprise cloud migrations optimizing for security and performance
- Additional: Research cloud platforms (Carleton), airline reservation systems, network stack development
